PROFILE SUMMARY

I am a data-driven Project Manager with 10 years of hands-on software development experience. This combination shapes how I work. I have written code, debugged production systems, and worked closely with developers during critical issues. That gives me a practical understanding of what teams actually need, not just what looks good in reports.

I have led cross-functional and remote teams delivering enterprise software across the full development lifecycle. My technical background includes .NET, SQL Server, REST APIs, JavaScript, and AngularJS, along with strong experience in Agile delivery, sprint planning, backlog management, and stakeholder communication.

My strength lies in bridging business and technology. I translate requirements clearly, identify risks early, and help teams solve problems independently instead of waiting for direction.

I focus on data, not assumptions, and prioritize clear communication, realistic timelines, and long-term maintainable solutions.

AREAS OF EXPERTISE

- **Technical Skills:** ASP.NET Core, ASP.NET MVC, C#, JavaScript, jQuery, Ajax, AngularJS, Kendo UI, LeafletJS, Microsoft SQL Server, Entity Framework, LINQ, REST APIs, Postman, Git, SVN, Database Optimization, Performance Tuning, Debugging
- **Backend & System Development:** API Development, Legacy System Maintenance, Code Refactoring, SQL Query Optimization, Backend Architecture, Production Issue Troubleshooting
- **Project & Delivery:** Agile Methodology, Sprint Planning, Backlog Management, Requirement Prioritization, Cross-functional Team Coordination
- **Business Analysis:** Requirement Gathering, Stakeholder Communication, Translating Business Needs into Technical Solutions
- **Core Strengths:** Root Cause Analysis, Complex System Debugging, Performance Problem Solving, Proactive Communication, Conflict Resolution

WORK EXPERIENCE

Percoid IT Solutions

Jun 2023 - Present

Project Manager

- Transitioned into this role from a software engineering, bringing direct technical expertise to project delivery and requirement analysis.
- Reviews and analyses business requirements and tickets prior to development, identifies ambiguities, and provides accurate effort estimations, reducing rework and preventing delivery delays.
- Leads a cross-functional team of 16 developers and 7 QA engineers across the full project lifecycle.
- Manages sprint planning, backlog prioritization, resource allocation, and risk mitigation to ensure on-time delivery within scope and quality standards.
- Facilitated 50+ stakeholder engagement and planning meetings, aligning cross-functional teams with business objectives and clarifying requirements.
- Implemented Kanban boards to optimize workflow efficiency, improve resource utilization, and reduce bottlenecks across delivery cycles.

Percoid IT Solutions

Oct 2022 - Jun 2023

Product Owner

- Gathered business requirements and created the product backlog, ensuring development focused on high-value deliverables.
- Increased sprint delivery speed by 20% by applying Agile methodology improvements and refining backlog grooming processes.
- Defined clear user stories and acceptance criteria, reducing ambiguities and rework.
- Collected and integrated user feedback to refine features and enhance customer satisfaction.

Percoid IT Solutions

Nov 2017 - Nov 2022

Software Engineer

- Developed and consumed REST APIs for seamless integration across systems.
- Designed, implemented, and optimized MS SQL Server databases, improving query performance.
- Produced CLEAN, maintainable code for front-end and back-end components.
- Collaborated closely with project managers to translate requirements into scalable solutions.

Softtech Foundation Pvt. Ltd.

Apr 2017 - Oct 2017

Dot Net Developer

- Led full-cycle development of software applications in C#, JavaScript, and SQL.
- Managed planning, scheduling, and delivery for small-to-mid scale projects.

EyeWeb Sys Pvt. Ltd.

Nov 2016 - Mar 2017

Dot Net Developer

- Participated in software development and conducted thorough code reviews to maintain high-quality standards and meet project deadlines.
- Developed database schemas, improved site functionality using Umbraco CMS.
- Resolved critical bugs and performance issues, enhancing stability and user experience

Deerwalk Services Pvt. Ltd**Apr 2015 - May 2016***Software Engineer*

- Built complex features using C#, JavaScript, and SQL within established coding standards.
- Improved existing codebases by enhancing performance, scalability, and maintainability.
- Assisted in project planning, task estimation, and scheduling.

PROCIT BV (Nepal company: IT Himalaya Pvt. Ltd)**Nov 2013 - Feb 2015***Trainee promoted to Junior Software developer*

- Assisted in writing, testing, and debugging code under senior developers' guidance, contributing to on-time task completion.
- Worked closely with team members to understand and meet project requirements and objectives.
- Identified and resolved basic bugs and errors during development, improving code quality.
- Collaborated with team members using version control systems such as Git and SVN for effective code management.

ACADEMIC ACHIEVEMENTS

London Metropolitan University**Sep 2009 - 2012***Bachelor of Science (Hons), Computing*
